

NORTHSIDE VISION

WHY WE STRONGLY RECOMMEND AN OPTOMAP RETINAL SCAN

Dr. Fairborn strongly recommends that all patient have an optomap® retinal screening each year as an important part of their well vision exam. The optomap® quickly and comfortably captures a panoramic image of the inside of your eyes, and **in many cases may help you avoid the inconvenience of pupil dilation.** The scan provides the doctor with valuable information that can help us protect your eyesight. The time-of-service cash fee for this important health screening is **\$42.00.**

Please indicate below whether you would like an **optomap®** retinal scan today.

- YES:** I would like the benefits of a laser retinal scan today.
- NO:** I assume the risk of foregoing this advanced screening tool at this time.
